Manufacturing & Distribution

Prophix

Your business is evolving, and the way you plan and report on your business should evolve too. Prophix helps mid-market companies achieve their goals more successfully with innovative, cloud-based Corporate Performance Management (CPM) software. With Prophix, finance leaders improve profitability and minimize risk by automating budgeting, forecasting and reporting and puts the focus back on what matters most – uncovering business opportunities. Prophix supports your future with AI innovation that flexes to meet your strategic realities, today and tomorrow. Over 1,500 global companies rely on Prophix to transform the way the work.

Business challenges

Each of SYSPRO's financial processes were being conducted in Excel. This was a time-consuming and difficult process that had an increased risk of error. SYSPRO relied on multiple Excel spreadsheets to produce their management reports, making consistent and reliable in-depth analysis difficult.

Why Prophix?

SYSPRO considered several CPM solutions in their research. SYSPRO choose Prophix for three primary reasons: ease-of-use, accurate results and the ability to get data out of their systems quickly and accurately. These differentiators helped SYSPRO choose a solution that would best meet their immediate needs and support their future growth.

“The integrated reporting, financial consolidation, budgeting and scenario planning capabilities, integrated at the detail operational level with SYSPRO, provide insights to our customers that translate to improved competitiveness due to an increased decision-making support capability”

– Paulo de Matos, Chief Product Officer, SYSPRO

The outcome

Two main goals of SYSPRO's Prophix implementation included:

- run a successful budgeting process
- provide cost center reports via Prophix rather than email

After determining SYSPRO's short-term objectives, Prophix implemented their solution in six to eight weeks. SYSPRO's Prophix software was customized to meet their unique requirements using Prophix's highly flexible Online Analytical Processing (OLAP) database.

SYSPRO pulled financial data from SYSPRO ERP into Prophix for analysis. SYSPRO uses their Prophix solution to conduct budgeting, forecasting, profitability analysis, personnel planning and cash flow planning. After the initial implementation of Prophix, SYSPRO was able to identify some immediate benefits. There was less manual intervention, resulting in fewer inaccuracies. This gave the finance department greater confidence in their numbers. SYSPRO was also able to have a faster turnaround of consolidated results and an easier time tracking the status of their budgets.

Future plans

SYSPRO is now building a forecasting model in Prophix to replace a system that exists outside of their CPM solution. Other future goals include a plan to implement Prophix reports and analysis globally. SYSPRO also plans to integrate their licensing database into Prophix to accurately and efficiently analyze and forecast customer numbers.

Return on investment

With Prophix, SYSPRO gained a greater understanding of their business with access to better quality data, seamless integration from all data sources to create accurate forecasts and ultimately make better and faster business decisions.
